Note:

All Health Information content is written by pharmacists who are professional writers and is reviewed by pharmacists with experience in reviewing pharmacy publications, including articles and books. In addition, a literacy expert reviews the language to ensure it is suitable for consumers.

Health Information Australia guarantees to review all topics annually and if there are regulatory changes relating to the condition or medicines involved. In the case of changes to content due to a regulatory change Health Information Australia will request that you destroy your existing brochures and will replace the hard copy brochures you have in stock at no charge. Digital brochures will be updated immediately.

All content is the copyright of Health Information Australia and may not be used or changed in any way without permission in writing from Health Information Australia.
